

A Schlumberger Company

Safety Data Sheet TRUVIS*

1. Identification			
1.1 Product identifier			
Product name	TRUVIS		
Product code	PID2300		
1.2 Relevant identified uses of th	e substance or mixture and uses advised against		
Recommended Use	Drilling fluid additive. Viscosifier.		
Uses advised against	Consumer use		
1.3 Details of the supplier of the	safety data sheet		
Supplier M-I L.L.C. P.O.Box 42842 Houston, TX 77242 www.miswaco.slb.com Telephone: 1 281-561-1511			
Schlumberger Canada, Ltd. 200, 125 - 9th Avenue SE Calgary, Alberta T2G 0P6, Canada			
Calgary, Alberta 126 0F0, Callaua			

Calgary, Alberta T2G 0P6, Canada Telephone: 1-613-992-4624

E-mail address sdsmi@slb.com

Prepared by

Global Regulatory Compliance - Chemicals (GRC - Chemicals), Bethicia Prasek

1.4 Emergency Telephone Number

Emergency telephone (24 Hour) Australia +61 2801 44558, Asia Pacific +65 3158 1074, China +86 10 5100 3039, Europe +44 (0) 1235 239 670, Middle East and Africa +44 (0) 1235 239 671, New Zealand +64 9929 1483, USA 001 281 561 1600 **Telephone Number** - Emergency telephone number (24 Hour) Canada (English/French): +1 866 928 0789

2. Hazards identification

2.1 Classification of the substance or mixture

GHS - Classification

Health hazards	
Carcinogenicity	Category 1A
Specific target organ toxicity (repeated exposure)	Category 2

Environmental hazards

Not classified

Physical Hazards

Combustible dust

2.2 Label elements

Hazard statements

H350i - May cause cancer by inhalation H373 - May cause damage to organs through prolonged or repeated exposure H232 - May form combustible dust concentrations in air

Precautionary statements

P201 - Obtain special instructions before use

P260 - Do not breathe dust/fume/gas/mist/vapors/spray

- P281 Use personal protective equipment as required
- P308 + P313 IF exposed or concerned: Get medical advice/ attention

P202 - Do not handle until all safety precautions have been read and understood

P314 - Get medical advice/attention if you feel unwell

P240 - Ground/bond container and receiving equipment

P241 - Use explosion-proof electrical/ventilating/lighting/equipment

P243 - Take precautionary measures against static discharge

P501 - Dispose of contents/ container to an approved waste disposal plant

Hazards not otherwise classified

None known

Unknown acute toxicity

Not applicable.

3. Composition/information on Ingredients

3.1 Substances

Chemical Name	CAS No	Weight-%
Aromatic amine treated mineral	Proprietary	60 - 100
Crystalline silica (impurity)	14808-60-7	< 3

3.2 Mixtures

Not applicable

Comments

Proprietary component(s) in section 3 of this SDS does not/do not trigger application of trade secret exemption under Hazardous Materials Information Review Act (HMIRA). The proprietary component in this product contributes to combustible dust

classification.

Crystalline silica is the most widely occurring of all minerals. The most common form of silica is sand. The International Agency for Research on Cancer (IARC) has designated crystalline silica in the form of quartz or cristobalite a Group 1 (carcinogenic to humans). This designation was based on an increased risk of lung cancer among crystalline silica exposed workers. IARC did note that carcinogenicity of crystalline silica in humans was not detected in all industrial circumstances studied. Further, carcinogenicity of crystalline silica may be dependent on inherent characteristics of the crystalline silica or external factors affecting its biological activity or distribution of polymorphs. (IARC Vol. 68, 1997, p. 41). The National Toxicology Program (NTP) classifies crystalline silica as "reasonably anticipated to cause cancer in humans" (6th Annual Report on Carcinogens, 1991). Long term inhalation of crystalline silica can also result in the lung disease, silicosis. Symptoms of this disease include coughing and shortness of breath. (NJ HSFS, January 1996) Percentages (concentrations) represented as a range are due to batch-to-batch variability.

4. First aid measures

4.1 First-Aid Measures

Inhalation	Move to fresh air. If breathing is difficult, (trained personnel should) give oxygen. Get medical attention immediately if symptoms occur.		
Ingestion	Call a physician or Poison Control Center. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person. Obtain medical attention.		
Skin contact	Wash skin thoroughly with soap and water. Remove contaminated clothing and launder before reuse. Get medical attention if irritation persists.		
Eye contact	Promptly wash eyes with lots of water while lifting eye lids. Remove contact lenses. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.		
4.2 Most important symptoms a	and effects, both acute and delayed		
Main symptoms			
Inhalation	Please see Section 11. Toxicological Information for further information.		
Ingestion	Please see Section 11. Toxicological Information for further information.		
Skin contact	Please see Section 11. Toxicological Information for further information.		
Eye contact	Please see Section 11. Toxicological Information for further information.		
4.3 Indication of any immediate	4.3 Indication of any immediate medical attention and special treatment needed		
Notes to physician	Treat symptomatically		

5. Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing media Water Fog, Alcohol Foam, CO₂, Dry Chemical.

Extinguishing media which must not be used for safety reasons None known.

5.2 Special hazards arising from the substance or mixture

Unusual fire and explosion hazards

I SWACO

A Schlumberger Company

Dusts or fumes may form explosive mixtures in air.

Hazardous combustion products

Harmful organic chemical fumes, Silicon oxide, Carbon oxides (COx), Nitrogen oxides (NOx), Hydrogen chloride gas.

5.3 Advice for firefighters

Special protective equipment for fire-fighters

As in any fire, wear self-contained breathing apparatus and full protective gear.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Wear suitable protective equipment. Evacuate personnel to safe areas. Prevent further leakage or spillage if safe to do so. Avoid dust formation. Suspended dust may present a dust explosion hazard. Avoid breathing dust; if exposed to high dust concentration, leave area immediately.

6.2 Environmental precautions

Do not allow material to contaminate ground water system.

Environmental exposure controls

Avoid release to the environment. Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and material for containment and cleaning up

Methods for containment

Cover powder spill with plastic sheet or tarp to minimize spreading.

Methods for cleaning up

Sweep up and shovel into suitable containers for disposal. Prevent dust cloud. Powdered material may form explosive dust-air mixtures. Take precautionary measures against static discharges. Use non-sparking tools and equipment.

6.4 Reference to other sections

See section 13 for more information.

7. Handling and storage

7.1 Precautions for safe handling

Handling

Handle in accordance with good industrial hygiene and safety practice. Avoid breathing dust; if exposed to high dust concentration, leave area immediately. Avoid contact with skin, eyes and clothing. Take precautionary measures against static discharges. Fine dust dispersed in air may ignite.

7.2 Conditions for safe storage, including any incompatibilities

Technical measures/precautions	Ensure adequate ventilation.
--------------------------------	------------------------------

 Storage precautions
 Keep container/package tightly closed and in a well-ventilated place. Follow safe

 warehousing practices regarding palletizing, banding, shrink-wrapping and/or stacking.

 Avoid contact with water and moist air - product is hygroscopic. Do not store and transport with oxidizers.

8. Exposure controls/personal protection

8.1 Control parameters

Component Information

Component	ACGIH TLV	OSHA PEL
Aromatic amine treated mineral (60 - 100)	Not determined	Not determined
Crystalline silica (impurity) 14808-60-7 (< 3)	0.025 mg/m ³	total dust respirable fraction

Crystalline silica (impurity)

OSHA - Final PELs - Table Z-3 Mineral Dusts

(30)/(%SiO2 + 2) mg/m3 TWA, total dust; (250)/(%SiO2 + 5) mppcf TWA, respirable fraction; (10)/(%SiO2 + 2) mg/m3 TWA, respirable fraction

8.2 Exposure controls

All chemical Personal Protective Equipment (PPE) should be selected based on an assessment of both the chemical hazard present and the risk of exposure to those hazards. The PPE recommendations below are based on an assessment of the chemical hazards associated with this product. Where this product is used in a mixture with other products or fluids, additional hazards may be created and as such further assessment of risk may be required. The risk of exposure and need of respiratory protection will vary from workplace to workplace and should be assessed by the user in each situation.

Engineering measures to reduce exposure

Ensure adequate ventilation, especially in confined areas.

Personal protective equipment Eye protection Hand protection Respiratory Protection	Tightly fitting safety goggles. Wear chemical resistant gloves such as nitrile or neoprene. All respiratory protection equipment should be used within a comprehensive respiratory protection program that meets the requirements of 29 CFR 1910.134 (U.S. OSHA Respiratory Protection Standard) or local equivalent. If exposed to airborne particles of this product use at least a NIOSH-approved N95 half-mask disposable or re-useable particulate respirator. In work environments containing oil mist/aerosol use at least a NIOSH-approved P95 half-mask disposable or re-useable particulate respirator.
Skin and body protection	Wear suitable protective clothing and gloves, Eye wash and emergency shower must be available at the work place.
Hygiene measures	Wash hands before breaks and immediately after handling the product, Remove and wash contaminated clothing before re-use.

9. Physical and chemical properties

9.1 Information on basic physical a	and chemical properties	
Physical state	Solid	
Appearance	Powder Dust	
Color	Off-white	
Odor	Odorless	
Odor threshold	Not applicable	
Property pH	<u>Values</u>	<u>Remarks</u> Not applicable No information available
pH @ dilution Melting / freezing point Boiling point/range Flash point Evaporation rate (BuAc =1)	No information available No information available No information available Not applicable	

Flammability (solid, gas) Flammability Limit in Air Upper flammability limit Lower flammability limit Vapor pressure Vapor density Specific gravity Bulk density Water solubility Solubility in other solvents Autoignition temperature Decomposition temperature Kinematic viscosity Dynamic viscosity log Pow	Not applicable No information available No information available No information available No information available 1.5 - 1.7 sg 560 kg/m ³ (34.9 lb/ft3) Insoluble in water No information available 190 °C / 374 °F No information available No information available No information available	20 °C
Explosive properties Oxidizing properties	Suspended dust may present a dust e No information available	xplosion hazard
<u>9.2 Other information</u> Pour point Molecular weight VOC content(%) Density	No information available No information available No information available No information available	

10. Stability and reactivity

10.1 Reactivity

Dust may form explosive mixture in air.

10.2 Chemical stability

Stable under normal temperature conditions and recommended use.

10.3 Possibility of Hazardous Reactions

Hazardous polymerization Not known.

10.4 Conditions to avoid

Avoid heat, flames and other sources of ignition. Avoid contact with water and moist air - product is hygroscopic.

10.5 Incompatible materials

Oxidizing agents.

10.6 Hazardous decomposition products

See Section 5.2.

11. Toxicological information

11.1 Information on toxicological effects

Acute toxicity Inhalation

Inhalation of dust in high concentration may cause irritation of respiratory system. Harmful:

	danger of serious damage to health by prolonged exposure through inhalation. Repeated or prolonged inhalation of crystalline silica dust can cause delayed lung injury, and other diseases, including silicosis and lung cancer.
Eye contact	Dust contact with the eyes can lead to mechanical irritation.
Skin contact	Repeated exposure may cause skin dryness or cracking.

Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

TRUVIS*

Toxicology data for the components

Ingestion

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Aromatic amine treated mineral	No data available	No data available	No data available
Crystalline silica (impurity)	= 500 mg/kg (Rat)	No data available	No data available

Chemical Name	IARC Group 1 or 2	ACGIH - Carcinogens	OSHA listed carcinogens	NTP
Aromatic amine treated mineral	No data available	No data available	No data available	No data available
Crystalline silica (impurity)	Group 1; Monograph 100C [2012] Monograph 100C [2012] (listed under Crystalline silica inhaled in the form of quartz or cristobalite from occupational sources); Monograph 68 [1997] Group 1; Monograph 68 [1997]	A2 Suspected Human Carcinogen	Present	Known Human Carcinoger

Sensitization	Not classified.
Mutagenic effects	No evidence of mutagenic properties.
Carcinogenicity	May cause cancer. Crystalline silica dust is listed by IARC in Group 1 as known to cause lung cancer in humans, if inhaled.
Reproductive toxicity	No evidence of toxicity to reproduction.
Developmental toxicity	Not known to cause birth defects or have a deleterious effect on a developing fetus.
Routes of exposure	Skin contact. Inhalation. Eye contact.
Routes of entry	Inhalation.
Specific target organ toxicity (single Not classified	
exposure) Specific target organ toxicity (repeated exposure)	Category 2.
Target organ effects	Lungs.
Aspiration hazard	Not classified.

12. Ecological information

12.1 Toxicity

Toxicity to algae See component information below.

Toxicity to fish

See component information below.

Toxicity to daphnia and other aquatic invertebrates

See component information below.

Chemical Name	Toxicity to fish	Toxicity to algae	Toxicity to daphnia and other aquatic invertebrates
Aromatic amine treated mineral	No information available	No information available	No information available
Crystalline silica (impurity)	No information available	No information available	No information available

12.2 Persistence and degradability

No product level data available.

12.3 Bioaccumulative potential

No product level data available.

12.4 Mobility in soil

No information available.

12.5 Results of PBT and vPvB assessment

This preparation contains no substance considered to be persistent, bioaccumulating nor toxic (PBT) This preparation contains no substance considered to be very persistent nor very bioaccumulating (vPvB)

12.6 Other adverse effects.

None known.

13. Disposal considerations

13.1 Waste treatment methods

Disposal Method	Disposal should be made in accordance with federal, state and local regulations.
Contaminated packaging	Empty containers should be taken for local recycling, recovery or waste disposal.

14. Transport information

14.1. UN number

UN No. (DOT)	Not regulated
UN No. (TDG)	Not regulated
UN/ID No. (ADR/RID/ADN/ADG)	Not regulated
UN No. (IMDG)	Not regulated

UN No. (ICAO)

Not regulated

14.2. UN proper shipping name

The product is not covered by international regulation on the transport of dangerous goods
